

MUHAMMAD TARIQ SOHAIL

Backend Developer | Automation Engineer

Karachi, Pakistan | +92 317 123 0693 | tariqsohail1110@gmail.com | <http://www.linkedin.com/in/tariq-sohail-725b00296> | <https://github.com/tariqsohail1110>

PROFESSIONAL SUMMARY

Backend Developer with hands-on experience building and refactoring RESTful APIs, relational databases, and workflow automation systems using Node.js, MVC architecture, and PostgreSQL. Experienced in automation engineering through n8n workflow design and AI-driven process integration (ElevenLabs), reducing manual effort and improving lead acquisition. Skilled in Python, NestJS, TypeScript, and Java, with a strong foundation in software engineering principles, version control (Git), and scalable system design.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, Java, Node.js, NestJS, TypeScript, ReactJS, Tailwind CSS, HTML, CSS
- Backend & API Development: RESTful API design, MVC architecture, monorepo architecture, role-based access control (RBAC)
- Automation & Workflow Engineering: n8n workflow automation, AI-driven process automation, ElevenLabs voice AI integration
- Databases & Tools: PostgreSQL, Git, version control, code refactoring, system scalability
- Spoken Languages: Urdu (Native), English (Fluent)

PROFESSIONAL EXPERIENCE

Backend Developer Intern — Digital Auxilius (DAX)

August 2025 – March 2026

- Refactored the "Calendax" backend application using MVC architecture, improving code maintainability and readability by approximately 30%.
- Designed and implemented an automated AI-driven calling workflow using n8n and ElevenLabs as part of automation engineering efforts, reducing human dependency and increasing lead acquisition.
- Collaborated on backend system design and REST API development to support scalable business workflows.

PROJECTS

Expense Tracker Backend — Node.js, PostgreSQL, MVC

- Developed a secure REST API for an expense management system using Node.js and PostgreSQL, featuring real-time transaction tracking, automated budget adjustments, and role-based access control within an MVC framework.

<https://github.com/tariqsohail1110/expense-tracker>

Expense Tracker Frontend — React.js, Tailwind CSS

- Developed a clean, responsive frontend for an expense management system using React.js and Tailwind CSS, featuring real-time data analytics, budget management, expense tracking, and user management.

<https://github.com/tariqsohail1110/expense-tracker-frontend>

Calendax Monorepo Backend (DAX) — Node.js, MVC

- Architected the transition of the Calendax backend into a monorepo architecture using MVC design patterns, reducing code redundancy and improving long-term system scalability.

<https://github.com/FaaiZHussain26/calendax-backend-monorepo>

EDUCATION

Bachelor of Science in Software Engineering — Sir Syed University of Engineering & Technology

- CGPA: 3.76 | Expected Graduation: 2027
